

REMARKS

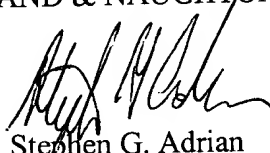

The above amendment to the claims has been made to correct the multiple dependency of the claims and to place the application in better condition for examination.

Attached hereto is a marked-up version of the changes made to the claims by the current amendment. The attached page is captioned "Version with Markings to Show Changes Made."

VERSION WITH MARKINGS TO SHOW CHANGES MADE

IN THE CLAIMS:

Claims 9 and 19 have been amended.

9. An image forming method according to claim 6 ~~any one of claims 6 to 8~~, wherein the energy of the flashtube is within a range from 0.5 to 3.0 J/cm² and the duration of the flash is within a range from 500 to 3,000 µs in the flash fixing step.

19. A method of forming an image by means of an electrophotographic process which comprises the steps of forming an electrostatic latent image by image exposure, visualizing the electrostatic latent image by development, transferring the visualized image onto the recording medium and fixing the transferred image, wherein

a developing agent containing the electrophotographic toner of claim 10 ~~any one of claims 10 to 18~~ is used in the step of developing the electrostatic latent image; and

a flash fixing system is used as the toner fixing system in the step of fixing the toner image after transferring the toner image, which has been visualized by the use of the developing agent, onto the recording medium.
